

Guemes Ferry Breakwater Section Replacement Project

Guemes Island Ferry – Anacortes Terminal

Last Updated August 24, 2015

Project Vicinity Map

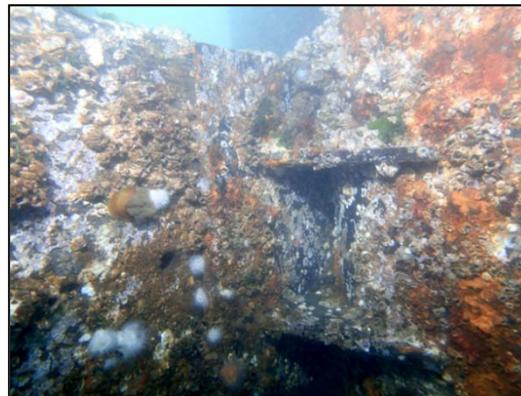

Project Number:	FEMP-6 Federal Aid #FBP-2029(051)	Project Length: 123 Ft
Type of Project:	Ferry Boat Program (FBP)	Construction: 2016
Project Description:	Improvements to the breakwater wave wall at the Anacortes Terminal, will include removal of creosote timber piles, hanging timbers, and timber walers from shoreward end of existing breakwater; installing new steel walers and vertical plastic timber to the breakwater wave wall.	
Status:	Design completed, waiting for necessary permits. We are anticipating construction during the permitted in-water work window, January – February 2016.	
Traffic Impacts:	There should be no interruptions to ferry service during construction of the project. The Contractors barge will be moored on the west side of the breakwater.	

Funding Sources:

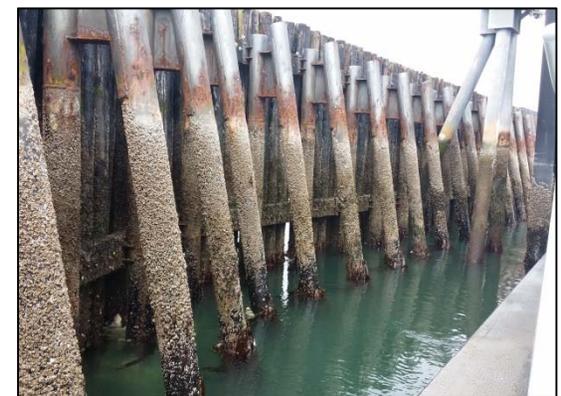

Ferry Boat Program (FBP) FFY 2013 & 2014 Federal Funding	\$542,353
Skagit County Road Fund (20% Match)	\$108,470

Total: \$650,823

Missing Bolts on the Lower Waler

Damaged Breakwater Wave Wall
