Most significant Challenges to Health/Wellness Recovery

Behavioral Health themes identified by the Trust

- Building awareness of behavioral health and recovery
- Integrating behavioral health services and resources in key places where people are
- Ensuring equitable access to services that are culturally informed
- Expanding workforce through use of peers and community members
- Increasing youth prevention, early intervention and recovery resources

1) Based on these areas identified by the Trust, where would you like the Trust to focus their upcoming planning efforts around behavioral health needs?

- Building awareness of behavioral health and recovery
- Integrating behavioral health services and resources in key places where people are
- Ensuring equitable access to services that are culturally informed
- Expanding workforce through use of peers and community members
- Increasing youth prevention, early intervention and recovery resources

2) Out of these, what would you prioritize?

3) Trust members: Based on this feedback, what do you think are the most promising areas for us to explore and plan around?
