Please describe the general operation of your service; including how it will operate in a manner consistent with WAC 246-976, the Regional Plan, and approved Regional Patient Care Procedures. For more information on agency and vehicle licensing see [website](#).

Provide an explanation of your:

1. Dispatch plan SEE ATTACHED PDF
2. Response plan SEE ATTACHED PDF
3. Response area SEE ATTACHED PDF
4. Type of transport - please circle one: Emergency, Interfacility, Both, or N/A.
5. Tiered response and rendezvous SEE ATTACHED PDF
6. Back-up plan to respond (may not apply to agencies doing interfacility transports only) SEE ATTACHED PDF

**Note:** Other services involved in your response plan must be informed by you that they are participants and must agree to that participation. Attach additional completed pages if you need more space.

### **9. Rural Service Attestation:**

**To be completed by agencies with non-medically trained ambulance drivers**

I hereby affirm and declare that the information provided on this application is true and correct, and that:

1. We have verified that each non-medically trained driver is at least 18 years of age.
2. We have performed a Washington State Patrol background check and have verified that each non-medically trained driver has no reported offenses.
3. We have verified that each non-medically trained driver holds a valid driver's license with no restrictions.

## 10. Signatures

I hereby affirm and declare that the information provided on this application is true and correct, and that:

1. We operate in a manner that is consistent with the Washington State Triage tools; EMS and Trauma Care Council Regional Plan, pre-hospital Patient Care Procedures, and department approved County Operating Procedures.
2. Our current certified EMS personnel are familiar with and utilize a Department of Health approved Medical Program Director (MPD) patient care protocols.
3. The vehicles identified on page three meet the minimum equipment requirements for the level and type of trauma verification requested by our service.
4. We meet the minimum staffing requirements as identified on page four.
5. We maintain current liability insurance coverage.
6. In accordance with RCW 43.70.490, our certified EMS personnel are adequately trained in and familiarized with techniques, procedures, and protocols for best handling situations in which persons with particular disabilities are present at the scene of an emergency.

# Our History

## WHO ARE WE

RECEIVED

OCT 16 2020

DOH/HSQA/OCS

Northwest Ambulance consists of over 150 EMTs, RNs, Dispatchers and Management Staff. We transport thousands of patients every year from all over the Puget Sound. Our main service area is focused in the downtown Seattle area, all of Pierce County and all the way up to Canada. We currently transport for hospitals, clinics, fire departments, and nursing homes. The Northwest Ambulance management team and its employees bring decades of experience to the provision of EMS, We have a track record of building exceptionally strong relationships with our customers and we are partners with local EMS as well as the community.

## WHAT DO WE BELIVE IN

When you call on Northwest Ambulance you call on a team with a passion for medicine and a devotion to patient care. We work to assure the best possible response times and unrivaled customer service. We see our work as more than a business. It's a commitment to you and your community.

For patients and employees alike, we work to create an environment where EMS professionals can do their best to help ensure retention of key personnel and critical talent. We see quality management principles and practices as essential as well, and we've worked to make sure the best practices are woven through all aspects of our organization at every level of our operation.

We rely on technology that works best, and we bring many years of experience to each operation we serve.

Our philosophy on the use of advanced and new technology is that it should improve the delivery of clinical care and customer service. It should improve employee working conditions and efficiency.

OCT 16 2020

DOH/HSQA/OCS

## HOW WE STARTED

Northwest Ambulance is committed to creating long-term EMS partnerships by delivering efficient, innovative, high quality and cost-effective services that are built around the needs of the people, hospitals and the communities we serve.

One of our core beliefs at Northwest Ambulance is balance.

We tend to the health and satisfaction of our patients, employees and customers so that no one element is out of proportion or unduly emphasized at the expense of the rest.

Our decade of experience has shown us that systems placing too much emphasis on financial gain do so at the expense of employees and customers. Organizations that put the major focus on customers often experience high employee turnover, creating a shortage of critical talent. Providers that yield to employee demands often are unable to sustain the cost of their practices.

Regardless of the scenario, patient care and satisfaction ultimately suffer when an organization lacks balance.

At Northwest Ambulance we understand that balance correlates to stability – and stability leads to the dependable business practices and long-term relationships we desire.

How can we assist you?

BLS Transport

ALS Transport

Event Standby

# Why we are requesting a BLS Trauma Verification License

Thank you for taking the time to review our EMS Agency Trauma Verification and Vehicle License Application Packet.

We are submitting this application in order to obtain permission to utilize a Skagit County BLS transport license with trauma verification.

Our intent is to be a verified trauma BLS license holder in Skagit County in order to conduct BLS transports.

Due to an increase in transport requests and partnerships with many of the major hospitals and nursing homes, inside Skagit County, we are requesting to obtain a BLS license to meet this demand.

At the same time we want to assure we are meeting Skagit County's EMS expectations and responsibilities of a private ambulance agency doing business inside Skagit County.

RECEIVED  
OCT 16 2020  
DOH/HSQA/OCC

# Dispatch Plan

We will be providing BLS patient transports in the Skagit County region.

Calls are dispatched 24/7 through Northwest Ambulance dispatchers located at the company headquarters at 8115 Broadway in Everett. Dispatchers obtain information from callers and determine the level of care needed for transport and dispatch an appropriate unit.

Dispatch operations occur through our integrated CAD system, Logis. In the case that this system fails, all crews are equipped with radios, smart phones with Nextel capabilities and pagers and will be notified directly by Northwest Ambulance dispatchers of any calls.

RECEIVED

OCT 16 2020

DOH/HSQA/OC

A black and white photograph of a Northwest Ambulance van parked in a parking lot. The van has "NORTHWEST AMBULANCE" written on its side and a caduceus symbol. The title "Response Plan" is overlaid in large white text on the left side of the image.

# Response Plan

Northwest Ambulance has crew quarters in Skagit County, and will obtain more crew quarters as needed to meet the needs of the county and its facilities and will station 4 units including 2 BLS ambulances and 2 CCT ambulances at strategic locations to respond to incoming calls.

The location of our stations is near strategic locations to best meet the needs of the hospitals, and nursing homes calling for service. System status management will be managed by NW ambulance internally to assure that our Hospital, and Nursing Facilities partners can and will receive a 30 minute or less response for all requests.

RECEIVED  
OCT 16 2020  
DOH/HSQA/OCS

# Level of Service BLS, ALS and CCT-RN

## **BLS/ALS for patient transports.**

Our Basic Life Support (BLS) ambulances are fully equipped and staffed by two highly trained Emergency Medical Technicians (EMT's).

Our Critical Care Transport (CCT) Ambulances are fully equipped with state of the art equipment and staffed by one highly trained nurse and one highly trained Basic Emergency Medical Technician.

Northwest provides ambulance service 7-days a week, 24-hours per day throughout the Pacific Northwest.

All ambulances are licensed and inspected by the Department of Health. We assure that all vehicles and equipment meet the highest standards, Utilizing Ford Transit and Ford E350 type vehicles provides the very best in dependability, durability, and patient safety.

RECEIVED  
OCT 16 2011  
DOH/HSQA/OCS

# Type of Transport

Northwest Ambulance will be conducting BLS and CCT-RN inter-facility patient transports.

OCT 16 2020  
DOH/HSQA/OCS

# Back up Plan and Interagency Relations

## **Back up plan-**

Additional units will respond to calls from Snohomish County if needed to assure ambulance requests are handled within 30 minutes or less from time of dispatch

## **Interagency Relations**

At this time we are only looking for IFT licensure and not 911 licensure. We also gladly offer our services to any other needs the county/region requests from us though.

RECEIVED

OCT 16 2020

DOH/HSQA/OCS

A black and white photograph of a Northwest Ambulance van parked in a lot. The van has "NORTHWEST AMBULANCE" and a logo on its side. The text "Duplication of Services, Consistency with the Approved Regional Plan and Patient Care Procedure" is overlaid in large white font on the left side of the image.

# Duplication of Services, Consistency with the Approved Regional Plan and Patient Care Procedure

There is an identifiable need to staff additional BLS/CCT ambulances to assure that patients are being moved from lower level of care to higher level of care on a consistent basis and within a 30 min time frame after request for service. With no other ambulance service in the county offering these services we are requesting that we be made trauma verified in the county.

Additionally, hospitals are increasing their footprint and requesting and require dedicated ambulance transport and the general population in Skagit County continues to grow leading to the need for more resources to respond to Facilities across Skagit County. Northwest Ambulance would like to take on that responsibility and as a requirement will need a BLS trauma verified license.

# Participation and Compliance with Regional Quality Improvement

Patient care reports are submitted electronically within 24 hours via ESO online, consistent with all HIPAA regulations, and are subjected to quality improvement review through Northwest Ambulance. Northwest Ambulance will also participate in regional EMS Council meetings so that we are in the forefront of any updates, changes or improvements that need to be made.

# Trauma Training Program

**1. How the service's present Certified EMS Personnel have been or will be, trained so they have the necessary understanding of Department-approved Medical Program Director (MPD) protocols.** All Northwest Ambulance employees are trained to recognize trauma indicators via ongoing EMS training and are tested regularly on company and county protocols. This training is provided monthly addressing topics defined by King County's EMS Online, and in-person practical training and testing is offered multiple times per month to employees by training-certified Northwest Ambulance staff.

RECEIVED  
OCT 16 2020

**2. How the service will assure that its personnel understand their obligation to comply with the MPD protocols.** Northwest Ambulance monitors each crew patient care report for quality assurance and quality improvement on a weekly basis. Any patient care that does not comply with the current MPD protocols is returned to the employee with written documentation outlining the concern and if needed, followed up with practical hands-on training

DOH/HSQA/OCS

**3. How the service will assure that its personnel will maintain currency with the protocols whenever they are revised.** We conduct training on a weekly basis that includes classroom and practical hands on discussing any changes to local or county protocols. This is in coordination with King County EMS online continuing based training written and practical's

**4. How the service will address numbers 1-3 for new personnel as they join the organization.** All new employees go through a minimum of one week in classroom training, followed up by in field training with field training officer. Each employee is given a probationary book that is evaluated by their new hire trainer, field training officer and a post probationary check off and skills practical. The written testing and field practical's include protocols required by our internal medical program director and follows the protocols of the MPD for the county we are working in.

# Trauma Training Program

## PROGRAM OVERVIEW

Northwest Ambulance agrees to implement the program outlined in the attached document. Oversight of the program will be done by the ALS/BLS/CCT Training Coordinator designee's. Each month will consist of a didactic lesson provided online by either Medic-CE or KCEMS EMS Online. The online training will be augmented by psychomotor evaluations conducted by a recognized Senior EMS Instructor or Emergency Medical Service Evaluators. The lesson content and objectives will concur with Washington State DOH/EMS approved curriculum. Each instructor will be provided with a copy of the curriculum and practical skill evaluation forms. Practical evaluations will be conducted using the latest up-to-date skill sheets provided by Washington State DOH. Students are expected to complete online didactic content and pass the final test with an 80% or better before attending the practical evaluations. Students will then be required to pass practical evaluations with an 80% and no critical fails, which results in immediate failure of the station. Students will be allowed two (2) attempts to retake practical evaluation with remediation immediately following each attempt. If possible a different evaluator will be provided upon each attempt. After third failure, student will be required to receive additional instruction on topic, either online or in person, and documentation of poor performance will be placed in training file. Subsequent failures to pass practical evaluation may result in disciplinary actions taken at General Manager discretion. Upon successfully passing practical station, documentation of all attempts and additional training needed to assist student will be placed in their training file to record patterns in abilities. Attached is the 3 year OTEP plan for Northwest Ambulance and EMS training requirements as specified by WAC 246-976-163. Our program meets and exceeds minimum training requirements needed for recertification.

**GUIDELINE FOR ADDRESSING MINIMUM/MAXIMUM LEVELS OF TRAUMA VERIFIED  
PREHOSPITAL EMS RESOURCES  
September 22, 2010**

EMS and Trauma Care (EMSTC) Regions are charged with identifying the minimum and maximum (min/max) number of trauma verified EMS resources. The min/max number for each type and level of service is included in the Regional EMSTC plan that is approved by the department. The min/max numbers identified in each approved EMSTC plan are used by the department when considering an application for trauma verification. Local EMSTC Councils provide input into this process and information from the Local Council informs the Regional EMSTC Plan.

Regional EMSTC Councils use this process in the following scenarios:

- When Regional and Local EMSTC Councils are developing their EMSTC plans.
- When a situation exists where adjustments in the department approved min/max numbers may be necessary.

Developing or changing min/max numbers is evidence based collaborative effort. Collaboration between prehospital EMS providers in a county as well as between local and regional EMSTC councils is a necessary part of this process. Evaluating a community's prehospital EMS resource needs must be based on objective criteria including, but not limited to:

- Demand for prehospital EMS resources. Has demand increased to a level where additional resources are necessary?
- Population. Have population numbers changed (increase or decrease) or are there projections for population changes that may impact need for EMS resources.
- Increased trauma responses. Has the number of emergencies involving severely traumatized patients increased?
- Available prehospital EMS resources. Has the number of available prehospital resources changed?
- Response time. Does system quality improvement/evaluation suggest that response time for prehospital EMS resources has increased? Do current resources meet response time requirements outlined in WAC 246-976-390?
- Level of verified Trauma service. Is there a demonstrated (data-driven) need for another level of service (ILS or ALS)?

**Available Resources**

When considering changes to the min/max number, Regional and Local EMSTC Councils should utilize the following resources to determine the need for the number of trauma verified prehospital EMS services, by County. Each County and Regional EMSTC Council may use all or some of the following resources:

- Regional maps by county on the DOH website (<http://ww4.doh.wa.gov/gis/EMS.htm>). These should be used by local EMSTC councils to establish the current placement of prehospital EMS resources.
- Regional tables, by county, found on the department's website. These may be used to establish the current level of service by vehicle location and staffing type.

- Regional maps by county with response time circles based on regional response time standards. These should be requested from the department by Regional EMSTC councils and provided to the local EMSTC council. Local EMSTC councils use this information to identify gaps in EMS coverage across the populated areas of the county.
- Staffing standards for type and level of service as identified in WAC 246-976-390. Used by local EMSTC councils to compare with information from individual EMS agencies on their 24/7/365 staffing capabilities to determine gaps in relation to standards found in the above noted WAC section.
- County population projection information. Used by local EMSTC councils to identify areas that may experience population growth (e.g., approved housing developments that will result in additional people moving into a given area).

### **Use of data**

Data from the above mentioned resources along with any other resources available to the councils will be used to:

- Determine the number, level and placement of trauma verified services to provide appropriate access to prehospital trauma care.
- Develop local council recommendation for min/max number changes to regional EMSTC councils.
- Develop formal recommendation from the regional EMSTC council to the department for changes to the department approved min/max numbers.

This process should be repeated each planning cycle and as needed when changes are indicated. Review of the data will identify whether or not changes are warranted or if current numbers are adequate to assure appropriate access to verified trauma services.

# Appendix 1- Approved Min/Max #'s of Verified Trauma Services – By Level & Type – By County

## Min/Max Numbers of Verified Trauma Services-By Level and Type- By County

County	Agency Type/ Care Level	State Approved		Current Status (Total number Verified)
		Minimum Number	Maximum Number	
Island County	Aid / BLS	4	5	4
