To whom it may concern,

I am submitting this email as I have several items of concern regarding the Buchanan Acres Comprehensive Plan and Zoning Amendment application. As a home owner living on the south side of Chestnut Pl. street I feel the need to comment on several items as I feel that that they are not be represented correctly in the application under the Rezone Request portion. Please see the following list of concerns / comments.

-The current roads in the Buchanan Acres development are already in need of repair, I am also concerned that the current size of the roadway is not of adequate size to handle additional traffic, in addition regarding the roadway there is a safety concern as last year the fire department came to put out a brush fire and one fire engine blocked the entire road preventing any traffic to go in or out. The applicants have a statement that the Chestnut Pl. road is underutilized, this is an opinion and not a fact. In order to handle the added traffic the roadway will need to be improved, this should fall on the developer not the current homeowner (current home owner association spent around \$10K last year to have the road re-sealed)

-Part of the territorial view that is enjoyed by the current owners to the North is the farmers fields North of Mud Lake road, including yearly migrations of swans and geese, my concern here is the homes that would be built across the road along Chestnut Pl. will block part of this view. The applicants have not been forth write with the current home owners, we would like to see what their development plan is.

-The current utilities are not adequate to support additional homes.

-Most of the homes already built have some type of water drainage problem, adding additional homes to the hillside could increase this problem.

Thank you for your time

Dan Hockett

Skagit River System Cooperative (SRSC) makes the following comments on behalf of the Swinomish Indian Tribal Community and the Sauk-Suiattle Indian Tribe.

We understand that the Nielsen Brothers, Inc. requests a change to the Comprehensive Plan and Zoning Map for their parcels P121598 and P39243 to better reflect the current use of the property in its support of the forestry industry. The zoning change would allow the company to build a facility to treat their wash water/wastewater from company equipment and conduct other drainage improvements to the property. Nielsen Brothers Inc. has requested for the property to be zoned Natural Resources Industrial, which we feel accurately reflects the usage of the property for the last 15 or more years.

We support the change in zoning, and especially their proposed wash water treatment facilities, which we view as an improvement for nearby surface waters, including Hansen Creek. The Nielsen Brothers, Inc. have been supportive of habitat restoration on the adjacent Hansen Creek, and we feel that their goals for improved site drainage and managing onsite wastewater support the adjacent natural resources at this property. These site improvements can be pursued if the zoning change were approved.

Categories: Comment

I am writing concerning the proposal by Geoff Devries on the change of use and future development of the site called Buchanan Acres. What is lacking in this application is lack of addressing any of the existing homes on the east side of the property that have been there since the early 90's and this property butts up against. It will effect our views if developed so it will have effect on existing homes in area, none of this is addressed in application. The biggest concern I have is that the existing property east of this proposal that was developed in the 90's has a drainage system consisting of a 10 inch pipe that runs down the center of development and then runs into a open ditch that drains along the eastern edge of the proposed property. This was not shown in the SEPA Checklist submitted. It runs more than seasonal and provides drainage for this whole development. It must be on record that all the existing drainage that runs along the east side of property is maintained, if this development is approved or you will have flooding problems with new development from water runoff.

Sincerely,
Paul Klein

Subject: 2021 Comprehensive Plan Amendments

As a resident of Skagit County for 20 years, I have developed a deep love for this county, for its rural nature, and its commitment to protect farmland and woodlands and the uncrowded, slower pace of life. Unfortunately, recently we are seeing an invasion of "Seattleopolis". The crazy prices for homes in the urban sprawl of King and Snohomish Counties have multitudes of buyers looking to move here. Even more unfortunately, we now have avaricious developers seeking to circumvent the protection of our fields and woodlots supposedly guaranteed by our Growth Management Act by proposing "Fully Contained Communities".

I am astounded that such a thing can even be proposed here. Policy/Code Amendment LR20-04 would open the door to transform over 1,200 acres into a small city – but one with no governmental oversight. And once the door is opened, we know there will be a cascade of other developers rushing to convert Skagit County to just another bedroom community for the megalopolis to the south of us. Our already crowded roads will become even more-so. Right now, Cook Road is seeing traffic backups of a mile long during peak periods – and there are literally hundreds of new homes that will use this road being built or in the process of permitting. There is also the question of water availability for all the people migrating here. We are seeing droughts all around us; we have to assume we will not always escape that fate. Where is this water coming from? What are the consequences to farmers and fish by this huge new drain on a scarce resource? And then what happens to all the waste and runoff from these small cities?

Realistically, the people living here will not work here. Studies have shown they will not pay their way to upgrade all the infrastructure they will use. Access to healthcare will suffer; law enforcement will be brought to a breaking point; even the new jail will soon be too small. Taxes will have to be raised on all of us who have lived here for decades to pay for the needs of the nomads.

Do we need more housing? Yes! But we need to exhaust every other alternative to FCC's before we even consider letting this evil genie out of the bottle. Please unanimously reject this proposal.

In addition, I urge you to reject PL19-0396 as diametrically opposed to existing zoning; reject PL19-0419 to maintain the rural atmosphere of this area; and reject LR21-05.

Sincerely, William Gregory

RE: Comments on proposed amendments to the 2021 Comprehensive Plan update.

Dear Peter:

Attached are comments submitted by Friends of Skagit County on the 2021 proposed amendments to the Skagit County Comprehensive Plan. In this letter we provide comments independent of the staff recommendations and we appreciate reviewing the staff reasoning for their recommendations to the Board of County Commissioners.

Since there is no open public hearing scheduled on the 2021 CP updates docketing, we assume this is the opportunity to submit comments concerning all of the proposed amendments. In the interest of time, please read the comments on LR20-05 Fully Contained Communities into the record first, then LR21-03, LR21-02 and the other submitted comments as time permits.

PL19-0396 Buchanan Acres Map Amendment and Rezone

Exclude. LAMIRD boundaries cannot be expanded beyond 1990 boundaries and even if that were possible, Lot 9 is the conservation and reserve portion of the CaRD and cannot be rezoned or separated from the other lots as an integral component of the CaRD.

PL19-0419 Nielsen Brothers Map Amendment and Rezone

Exclude. GMA explicitly requires the identification and protection of natural resource lands including Ag-NRL. Non-conforming uses do not change the requirement to protect the Ag-NRL zoning.

LR20-02 Small Scale Business Zone Use Modification

Include.

LR20-05 Fully Contained Community.

Exclude.

FCCs are considered urban growth areas per RCW.36.70A.350 (2). GMA requires counties to allocate 20-year population projections between cities/towns, their Urban Growth Areas (UGAs) and to the rural County lands each year. Cities and towns accommodate increased populations by allowing additional development inside city/town limits and in UGAs. Until the cities, towns and UGAs are unable to take additional development, there is no need to consider FCCs in Skagit County.

GMA prohibits plans that allow urban development outside of cities, towns and UGAs.

UGAs cannot exceed the area needed to accommodate the growth management planning projections, plus a reasonable land market supply factor, or market factor. If UGAs must be properly sized and cannot be “over-sized”, the County has no need to change the Comprehensive Plan, countywide planning policies or development codes to permit FCCs.

RCW 36.70A.350 outlines the process for establishing FCCs. The requirements under this section do not appear to allow a piecemeal process. The RCW does not appear to allow for the adoption of changes to the Comprehensive Plan without following the process for population allocation. Assigning an arbitrary population figure does not follow the process for population allocation under the RCW for FCCs.

RCW.36.70A.350 (2) states “...Final approval of an application for a new fully contained community shall be considered an adopted amendment to the comprehensive plan prepared pursuant to RCW36.70A.070 designating the new fully contained community as an urban growth area.”

The RCW does allow reserving a portion of the 20-year population projection to establish FCC; however, **the portion reserved for the FCC is removed from the UGA allocation.** (emphasis added).

The staff report stated that “ Because it is master planned, an FCC does not have the constraints of the existing major UGAs for accommodating, larger, high density developments as infill projects.” Nothing in the GMA RCWs says this is the case. Environmental regulations for critical areas and development regulations for UGAs would apply to FCCs because they are considered UGAs.

The GMA’s only reference to “master planned” is for master planned resorts where residential development must be related to the on-site recreational nature of the resort.

Like any urban growth area, FCCs would be eligible to be annexed into cities/towns.

FCCs are not just residential developments. RCW 35.70A.350 lists criteria for FCCs and includes at (1) (d) “... A mix of uses is provided to offer jobs, housing and services to the residents of the new community;...”.

The GMA, Skagit County Comprehensive Plan, policies (CPP) and codes discourage residential development in resource lands. CPP 8.9 further states that the “principal and preferred land uses will be long term commercial resource management” on natural resource lands.

Under GMA, cities, towns and their UGAs are identified as areas for development. RCW 36.70A.110 Comprehensive plans – Urban growth areas – “.... (3) Urban growth should be located first in areas already characterized by urban growth that have adequate existing public facility and service capacities to serve such development, second in areas already characterized by urban growth that will be served adequately by a combination of both existing public facilities and services and any additional needed public facilities and services that are provided by either public or private sources, and third in the remaining portions of the urban growth areas. Urban growth may also be located in designated new fully contained communities as defined by RCW 36.70A.350.”

The population projection is the key starting point for determining the amount of land that is needed and appropriate for future growth, not vice versa.....A County’s UGA designation cannot exceed the amount of land necessary to accommodate the urban growth projected by OFM, plus a reasonable land market supply factor. RCW36.70A.110; RCW 36.70A.115 *Thurston County v. Western Washington Growth Management Hearings Board*, 164 En.2d 329, 350 (2008).

RCW 36.76A.350 New fully contained communities lists criteria for reviewing proposals to authorize new FCCs located outside of the initially designated urban growth areas.

At “...(1) (c) **Buffers are provided between the new fully contained communities and adjacent urban development;...**”. This requirement shows that FCCs must be adjacent to existing urban development, not located away from UGAs in a county’s rural area or on resource lands. **(Emphasis added)**.

(2) New fully contained communities may be approved outside established urban growth areas only if a county reserves a portion of the twenty-year population projection and offsets the urban growth area accordingly for allocation to new fully contained communities that meet the requirements of this chapter. Any county electing to establish a new community reserve shall do so no more often than once every five years as a part of the designation or review of urban growth areas required by this chapter. The new community reserve shall be allocated on a project by project basis, only after specific project approval procedures have been adopted pursuant to this chapter as a development regulation. When a new community reserve is established, urban growth areas designated pursuant to this chapter shall accommodate the unreserved portion of the twenty-year population projection....” **(emphasis added)**.

As long as Skagit County, its cities and UGAs can accommodate the annual state population projections there is no need to create an FCC or another stand alone Urban Growth Area. Skagit County should not change the Comprehensive Plan, Development Regulations and CPPs to allow FCCs.

LR20-05 Public Notice Ammendment for MRO extraction areas.

Include.

LR20-06 Outbuildings in Rural Zones.

Exclude.

LR20-07 Accessory Dwelling Unit Code Amendment.

Exclude.

LR20-08 MRO review.

Exclude. We request a full review be done at the next multi-year Comprehensive Plan update.

LR21-01 Delvan Hil Road Weide Quarry C-20 MRO reconsideration and moratorium.

Exclude.

LR 21-02 Clarify CaRD Land division and reserve function.

Include.

Additional background information:

Friends of Skagit County v. Skagit County No. 98-2-0016 Petition for Review, WWGMHB, 1998.

B. Requirements of The Comprehensive Plan

“ In Skagit County the Countywide Planning Policies (CPPs) are also Comprehensive Plan policies. CP, Part IV, Appendix K incorporated by CP at 1. The CPPs state that rural development should “have limited impact” on resource lands. CPP 2.3, 1997. Residential development “shall be made in a manner consistent with protecting natural resource lands.” CPP 4.6.....The CPPs require residential uses to be subservient to natural resource land uses..... Residential development shall be strongly discouraged within designated forest lands.” CPP 5.9 (emphasis added in the original).Principal and preferred land uses will be long term commercial resource management in designated NRLs. CPP 5.11. The CPPs state “natural resource lands shall be protected by restricting conversion.” CPP 8.1.

.....Even the CaRD subsection of the Comprehensive Plan recognizes the importance of protecting natural resource lands. Objective 5 in the CaRD subsection of the CP at 4-37 seeks to “create development patterns that provide...natural resource land and critical area conservation and protection.” The intent of a CaRD land division is to “buffer areas to reduce land use conflicts and minimize the loss of designated natural resource lands.” CP Policy 1.2.2 at CP4-37. Open space in natural resource lands must be either “set-aside as a conservation easement in perpetuity” or set-aside as a condition/covenant/restriction (CCR) “which removes the development right on such lands” until the land is no longer designated as natural resource lands. CP Policy 1.8.1 and 1.8.2 at 4-40.”

This appeal of the short CaRD subdivision ordinance states that the CaRD Ordinance is an implementing regulation. RCW 36.70A.040(3) and must assure that building lot clustering and alignment does not complicate access, normal field operations or harvesting on natural resource lands.

In addition the appeal cited CPP 7.4 which “requires implementing codes to “provide clear regulations to reduce the possibility of multiple interpretations by staff and applicants.”. The appeal challenged whether the building lot placement was required to minimize potential impacts on “adjacent properties” within natural resource lands. It was unclear whether the remainder portion of the subdivided property was protected from potential impacts.

It is unclear whether the current CaRD land division policies uphold and comply with the original intent to identify and protect natural resource lands and restrict inappropriate development in rural lands. We are especially concerned that the remainder portion of the set-aside as a land reserve can be re-designated through a comprehensive plan amendment.

We urge staff, County Commissioners and Planning Commission members to review the existing policies and codes with the original documents and WWGMHB decisions and propose changes needed to uphold the GMA.

LR21-03 Prohibit **additional** mitigation banks and use of Skagit mitigation banks by other counties.

Include with suggested modifications.

We withdraw the request for moratorium on future wetland banks. We modify the request to be only a revision to code to specify wetland mitigation bank credits be used for development applications within Skagit County. The concern stems from the proposed Bellingham Urban Mitigation Bank’s map of its service area to include parts of northern Skagit County. While the operations and oversight of wmb is by the U.S. Army Corps of Engineers and the WA State

Dept. of Ecology, the area for the location as well as the use of credits should be decided by local municipal governments since they control the planning and permitting process that may make mitigation necessary

LR 21-04 Ag processing facilities in BR-Light Industrial.

Include.

Friends supports efforts to locate additional food production and distribution in the BR-LI zone, keeping Ag-NRL prime soils in production which prevents conversion of farmland to other uses.

LR21-05 Expand pre-existing natural resource-based uses in Ag-NRL.

Exclude.

C21-1 2020 Comprehensive Parks and Rec Plan

Include with corrections attached at the end of this document.

C21-2 SEPA Determination Reviewing Timing

Include.

C21-3 Hamilton Zoning & Comprehensive Plan updates

Include.

C21-4 Front setback to include Class 19 roads.

Include.

C21-5 Pre-Application Requirement

Include.

C21-1 2020 Comprehensive Parks and Rec Plan

Suggested Corrections.

1. The Skagit County Parks and Recreation Plan has used data and information from the Skagit County UGA (Urban Growth Areas) Open Space Concept Plan completed as part of a settlement agreement when Friends challenged whether the County had complied with a section of the GMA that required the county to identify open space in and between UGAs. The plan was not intended to address all open space in the county, nor was it intended to be used without any update process to guide the cities and county's subsequent decisions on open space within and between UGAs.

The legal definition of UGAs includes the areas within cities or towns limits and the nearby unincorporated areas of the county that have been identified for future growth in the city and county planning process.

We urge SCPR to add the complete and correct name of the study (as above) as well as to add language to more accurately reflect that it was a concept plan for meeting the requirements of GMA and may be used for future planning of open space within and between UGAs.

2. Any update of the SCPR plan should reflect accurate and current data. Table 3-1 Summary of Park and Recreation areas in Skagit County lists as the source of the data the “SC UGA Open Space Plan, B-47”. The original text lists SCPR acres owned as 1,710, not 2,235 shown in the SCPR document. Further the data in the SC UGA Open Space Plan is more than 12 years old. SCPR should update their plans with current data and cite the sources of the data.

3. The SCPR plan states at page10-12: “...The Skagit County Planning Department has full review of potential open space areas. The UGA Open Space Concept Plan was forwarded to the Planning Commission and approved by the Board of County Commissioners in 2009. The plan should act as an extension of this parks and recreation plan...”. The SC UGA Open Space Concept Plan is not and should not be considered an extension of the SCPR plan. The SCPR can use the plan as a conceptual guide to complete additional planning or as a reference for information included in the SCPR Comprehensive Plan.

4. The SCPR CP uses the words “open space” generically. The definition of Open Space in the Skagit County 2016 Comprehensive Plan should be used for consistency in this plan:

“ **Open space:** any land area, the preservation of which in its present use would conserve and enhance natural or scenic resource; or protect streams or water supplies; or promote conservation of soils, wetlands, beaches or tidal marshes; or enhance the value to the public of abutting or neighboring parks, forests, wildlife preserves, nature reservations, sanctuaries or other open space; or enhance recreational opportunities; or preserve historic sites. Public open space is publicly owned land that has been or will be set aside for open space and recreational use. Private open space is privately owned land that has been or will be set aside by operation of the Critical Areas Ordinance, by voluntary conservation, or by land reserve easements. Current use open space taxation program includes properties utilized for agriculture, timber , and open space uses provided in Chapter 84.24 RCW.”

SCPR should use the same definitions in the SC Comprehensive Plan for consistency and to clarify the inevitable confusion created by using more than one definition.

Thank you for your time and assistance. Should you have questions or need additional information please contact us.

Yours sincerely,

Ms. Ellen Bynum

Executive Director
