Proposal Description

The Growth Management Act (GMA) requires all cities and counties in Washington to adopt regulations protecting “critical areas”. The Washington State Growth Management Act (GMA) requires Skagit County to update its Comprehensive Plans and implementing development regulations every 10 years (RCW 36.70A.130). As part of that update, the County is required to evaluate and, if needed, revise its Critical Areas Ordinance (CAO). Regulated critical areas include wetlands, aquifer recharge areas, fish and wildlife habitat conservation areas, frequently flooded areas, and geologically hazardous areas.

Skagit County is updating the Critical Areas Ordinance (SCC 14.24) as part of the periodic Comprehensive Plan update. Project documents including the third draft, staff report, and other materials may be found on the project website referenced above. Additional changes in the third draft are outlined in the staff report.

SEPA Threshold Determination

Skagit County determined on May 15, 2025, that this proposal does not have a probable significant adverse impact on the environment and issued a SEPA Determination of Non-Significance (DNS). An environmental impact statement is not required under the State Environmental Policy Act, RCW 43.21C.030(2)(c). This determination was made after review of a completed environmental checklist and other information on file with the lead agency and is available upon request. Pursuant to SCC 16.12.210, no administrative appeal process is available for this legislative action.
