Proposal Description

The proposed changes relate to stormwater construction regulations in the unified development code, Title 14. Specifically, the proposal amends Chapter 14.04 Definitions, Chapter 14.18 Land Divisions, Chapter 14.32 Stormwater Management, and adds a new Chapter, 14.22 Land Clearing.

The amendments ensure continued compliance with the Skagit County NPDES permit and adopts the standards of the 2019 Stormwater Management Manual for Western Washington throughout unincorporated Skagit County. The amendments create a single threshold for residential development outside of the NPDES area and retains the current thresholds inside the NPDES area. Other changes include a 20 year review provision for new development intending to use existing regional facilities, permit application dates for adherence to the code, and additional incorporation of low impact development design concepts. The proposed Land Clearing code consolidates existing standards in order to integrate stormwater design considerations early in the review process.
