

Upper Finney Creek Bridge (Seismic Retrofit)

Finney Creek Road Closure August 1, 2022, through March 1, 2023

(MP 4.6 to 4.7)

Updated July 21, 2022

Project Vicinity Map

Project Number:	ES40093-2	Project Length:	300 Feet
Type of Project:	Rehabilitation	Construction:	Summer 2022
Project Description:	The project is located at Finney Creek Road at milepost 4.6 to 4.7. The existing Upper Finney Creek Bridge is currently posted with weight limits, which includes the U80 logging truck. The project will strengthen and increase capacity for logging trucks and equipment crossing the bridge. The project will include retrofitting the existing columns, strengthen the deck, cap beams, girders, and footings to increase seismic performance.		
Status:	In Construction		
Traffic Impacts:	Traffic will be impacted during construction of the project. It is necessary to close Finney Creek Road (County Road # 06120) to through traffic at milepost 4.6 to milepost 4.7. The roadway closure duration shall be approximately seven (7) months, beginning on August 1, 2022, through March 1, 2023. The bridge is an important logging and recreational route connecting the Mount Baker-Snoqualmie National Forest and private lands to SR 20 near Concrete, Washington.		

Funding Sources:

FFY 2019 Local Bridge Program
 Federal Funding
 Bridge Advisory Committee \$ 3,000,000

Total: \$ 3,000,000
