

HYDRAULIC TECHNICAL DOCUMENTATION TABLE OF CONTENTS

I. Background	1
A. General.....	1
B. Purpose of Documentation.....	1
C. Study Area	2
D. Skagit River Basin	2
II. Hydraulic Analysis Methodology	2
A. Model Extent.....	2
B. Study Approach	3
C. Floods Studied	3
D. Description of Hydraulic Models.....	3
1. UNET Model Development	3
a. Purpose of Model	4
b. Procedures and Process	4
c. Boundary Conditions	5
d. Basic Assumptions and Limitations	5
2. FLO 2-D Model Development	5
a. Purpose of Model	6
b. Procedures and Process	6
c. Boundary Conditions	7
d. Basic Assumptions and Limitations.....	7
3. Structures Affecting Flow	8
a. Levees	8
b. Bridges	8
c. Diversion/Impoundment Structures	9
4. Levee Breach Methodology	10
III. Model Calibration.....	11
A. Sources of Data.....	11
B. UNET Calibration.....	11
C. FLO-2D Calibration.....	13
IV. UNET/FLO-2D Results and Output.....	14
A. Index Points	14
B. Flow/Stage/Frequency Relationships.....	14
C. Floodplain Delineations.....	15
D. Qualification of Base Condition Results.....	15
V. The Use of Hydraulic Results for Developing Project Outputs.....	15
A. Risk-Based Analysis	15
B. Overview of RBA in Flood Management Studies	16
C. Flood Damage Reduction Analysis Model	16

D. Uncertainties Specific to the Skagit River Study.....	16
E. Expected Annual Damages	17
F. Expected Annual Exceedance Probability	17
G. Long-Term Risk.....	17
H. Conditional Probability of Non-Exceedance	17
I. FEMA Certification	18
References	19

LIST OF TABLES

Table 1	Skagit River Cross Section Comparison (1975-99) – Summary Table	4A
Table 2	FLO-2D Dynamic Wave Coefficients	7
Table 3	Modeled Bridges on the Skagit River	9
Table 4	Levee Failure Points in UNET.....	10A
Table 5	December 1975 Simulated vs. Observed High Water Marks.....	12B
Table 6	UNET Roughness Ranges.....	12
Table 7	November/December 1995 Simulated vs. Observed High Water Marks	13
Table 8	FLO-2D Floodplain Roughness Values.....	13
Table 9	Variation of Roughness Values for Rating Curves.....	14A
Table 10	Rating Curves with Uncertainty.....	14B
Table 11	5, 50, and 95% Flow Peaks at Each Index Point	14C

LIST OF FIGURES

Figure 1	Damage Reaches – Skagit River Valley, WA	10B
Figure 2	December 1975 Simulated and Observed Hydrograph at Mount Vernon....	12A
Figure 3	Observed Versus Simulated November/December 1995 Event at Mount Vernon.....	13A

PLATES

Plate 1	Study Area Map with Locations of FLO-2D Modeling, UNET Cross Sections, and Levees

LIST OF APPENDICES

Appendix A	Background Hydrology Reports
Appendix B	Water Surface Profiles With Levee Failure Points and Varying Debris Loading Runs
Appendix C	10- to 500-year Floodplain Maps
