

PROPOSAL Attachment #1 – Signature Page

The bidder certifies by the below signature that he/she acknowledges and accepts the following requirements:

- Bidder will support the contract design of the vessel with engineering, studies, and equipment information as specified in the RFP. Such support will occur in advance of any equipment purchase order.
- Bidder will offer the agreed upon scope of supply, including equipment, studies, documentation, and commissioning services, at the proposed price, to all prime contractors (shipyards and shore contractors) seeking to bid on the vessel construction and terminal modification projects.
- Changes to scope of supply and price will only be as mutually agreed in writing with Skagit County.
- It is recognized that changes in component prices are unavoidable given the time scale of the project. Reasonable price changes will be accepted with adequate documentation of increased component costs.

NOTICE: work performed at the Anacortes terminal (e.g. system commissioning) may be subject to Washington State prevailing wage rate laws. Similar requirements could apply to vessel construction, depending on state laws applicable to the chosen shipyard.
